

Call for Tutorials

Core C++ <local> 2021: August 24-26

Pre-conference Tutorials Day: Tuesday August 24th 2021

Deadline for submissions: Jun. 30th

corecpp.org

Following the success of Core C++ 2019 we are excited to launch Core C++ 2021 which will be focused this year on the local C++ community. The conference will take place again at the Academic College of Tel Aviv-Yaffo.

We are planning a pre-conference tutorials day, for experts and lecturers who are willing to give a full day tutorial on any C++ subject. The tutorials would not be included in the conference ticket and require a separate paid registration. Revenues would be shared with the tutorial provider (that is, *you*), upon invoice, based on the conference compensation plan for tutorial providers.

Format

Tutorials are full day long, 9:00 to 16:00, with one hour break (+small coffee breaks). It may include hands-on practice, learning new techniques, discussions and any other activity that you feel may be suitable.

You may propose a tutorial for beginners, medium level or advanced practitioners. The tutorial can be in English or in Hebrew.

Suggested Topics

To get ideas for tutorial topics you may browse CppCon 2020 classes, at this link: <https://cppcon.org/2020-classes>

To propose a tutorial please fill the form at: <https://forms.gle/rKBhxSKhSHFWZarPA>
Please note that we accept up to a maximum of two tutorial proposals per person.
The deadline for submissions is **June 30th 2021**.

The quality of the proposed tutorial would be judged according to the following criteria (among others):

- Relevancy and interest of the topic to the C++ community
- Details: we need to understand the structure and details of the tutorial
- Past Experience: we will prefer presenters who have proven presentation experience (e.g. talked in previous C++ events) and/or training experience (e.g. are actually doing C++ training).

For any questions feel free to contact us at info@corecpp.org.
